

Index

Volume 45, 2001

Compiled by Edward Swanson

General Procedures Used in Compiling the Index

The following types of entries are included:

- a. authors—of articles, reviews, and letters
- b. titles—of articles and of articles about which letters were published
- c. subjects—of articles and of books reviewed

Subject entries for individuals are identified by “(about)”; letters are identified by “(c)”.

Reviews are indexed by name of reviewer and by subject of the work reviewed, identified by “(r)”. They are also listed by title under the heading “Books reviewed”.

Entries are arranged word by word following the “file-as-spelled” principle. Numbers are arranged before alphabetical characters; acronyms without internal punctuation are arranged as words.

Subject headings are based on: *ASIS Thesaurus of Information Science and Librarianship*, edited by Jessie L. Milstead (Medford, N.J.: Published for the American Society for Information Science by Learned Information, Inc., 1994).

Paging of Volume 45:

Pages 1–68 = Number 1 (January)

Pages 69–112 = Number 2 (April)

Pages 113–184 = Number 3 (July)

Pages 185–224 = Number 4 (October)
