SOURCES FOR MULTIMEDIA STORAGE EQUIPMENT

The Internet is an extraordinary source for information about multimedia storage equipment. The Online Librarians Warehouse’s website is the most useful to librarians and offers access by product and by company. It provides a company’s address, telephone numbers, including toll-free numbers when available (occasionally out of date), contact person (occasionally out of date), e-mail address, and website, if the latter two are available.

Thomas Register also has a helpful website that can be searched by product or service, company name, and brand name. It also includes the company’s telephone numbers, e-mail, and website, if the latter two are available. In addition, it provides information important to the business world; including, but not limited to, assets, number of employees, and year the company was founded.

The images and information on the Internet are generally of such a high quality that manufacturers’ catalogs are not necessary until specific products of interest have been identified. For these products, call the manufacturers or distributors directly rather than send e-mail or fax to receive the most effective responses to your inquiries.

Automated Storage & Retrieval Systems of America (ASRS)  
(Manufacturer of Elecompack®)  
225 W. 34th St., Ste. 1708  
New York, NY 10122
