

Survey

Electronic Resources Usage Statistics

1. How often (if at all) do you collect vendor-provided usage statistics for electronic resources?
2. Do you collect stats for the title level (individual e-book, e-journal) or for the resource level (R2 Library, ScienceDirect, Project MUSE)?
3. How do you collect stats? Are you manually collecting stats? Using SUSHI? Outsourcing using a vendor-supplied service (e.g., Serials Solutions)?
4. What mechanism do you use to collate stats? Excel? ERM? Other?
5. How do you distribute stats to internal library personnel?
6. Has your institution made efforts to assess electronic resource usage at the session level? If so, how? If not, are there plans to do so?
7. How does your institution utilize the electronic resource usage statistics it collects? (Check all that apply)
 - Collection development/management
 - Promotion/public relations
 - Assessment/evaluation
 - Reporting to accrediting or other agency (e.g., ARL)
 - Training library staff
 - Other (please specify):
8. Would you be willing to speak with us further on this topic? If so, please provide contact information.
