Abstract: Helland, a software architect at Microsoft, compares the growth of cities in the 1800–1900s to the current service-oriented architecture, providing an evolving infrastructure in support of commerce. In both cases the standardization of infrastructure facilitated the development and transportation of essential commodities.

Hickey, Thomas D. "Web Services for Digital Libraries." Paper presented at European Library Automation Group 2003, Cross Language Applications and the Web 27th Library Systems Seminar, Bern, Switzerland. April 4, 2003. www.elag2003.ch/pres/pres_hickey.pdf (accessed April 3, 2006).

Ray, Randy J. and Pavel Kulchenko. *Programming Web Services with Perl*. Sebastopol, CA: O'Reilly, 2002.

O'Reilly abstract: "Programming Web Services with Perl is written for Perl programmers who have no prior knowledge of web services. No understanding of XML-RPC or SOAP is necessary to be able to apply these technologies easily, through the use of publicly available Perl modules detailed in the book. If you're interested in applying XML-RPC and SOAP technologies to distributed programming applications, then Programming Web Services with Perl is a book you'll want to have." Sample chapters and ordering information is available at the book's Web site at www.oreilly.com/catalog/pwebserperl.

Sholler, Daniel. *Syndication and User Interfaces Are the Primary Motivations for Web Services*. Stamford, CT: Gartner, January 25, 2006. www.gartner.com/DisplayDocument?doc_cd=131842 (accessed April 3, 2006).

Gartner abstract: "Web services are most closely associated with the mechanisms and services that support system-to-system interactions over the Internet. However, this isn't the only class of service; others will have immediate and profound effects on organizational communications."

Vendor Initiative for Enabling Web Services (VIEWS). www.views-consortia.org.

Site available as of March 2006, but no longer being maintained since this group has been superseded by the NISO Web Services and Practices Working Group.

Web Services Interoperability Organization (WS-I). www.ws-i.org (accessed March 1, 2006).

Abstract: "WS-I is an open industry chartered to promote Web services interoperability across platforms, operating systems, and programming languages." This resource is primarily oriented to large-scale developers of applications based on Web services.

Whit Andrews, et al. *Hype Cycle for Web Services, 2005*. Stamford, CT: Gartner, July 20, 2005. www.gartner.com/DisplayDocument?doc_cd=127574 (accessed April 3, 2006).

Gartner abstract: "No longer are Web services decisions questions of whether Web services have value; in-

stead, the question is how deeply to dive into Web services to extract value. Perceiving the stage of hype maturity these ideas or capabilities have achieved is an effective method to advance such decisions."

World Wide Web Consortium (W3C). *Web Services Activity*. www.w3.org/2002/ws (accessed April 3, 2006).
