Best read from cover to cover, this is not a quick reference tool because of the high text density and the lack of illustrations. Combined with Sandra Hughes-Hassel and Anne Wheelock's The Information-Powered School (ALA, 2001) and Sandi Zwann's Build Your Own Information Literate School (Libraries Unlimited, 2005), Carlson and Brosnanah provides a clearly written example of one method that can enhance the research and writing experiences of middle school students. It is a useful addition to the professional development library for teachers and teacher-librarians.—Debra Engel, Associate Dean of Libraries for Public Service, University of Oklahoma, Norman

What do libraries do, for whom do they do it, and why does it matter? *Inside, Outside, and Online* gives a poignant yet realistic look at these questions and leads the reader through the steps necessary to answer them. The author offers a good balance between informative and anecdotal prose, often relying on stories and recollections from colleagues and personal experience. The writing is fresh, personal, and relevant. With a forward by Steven Cohen, the book provides its readers with a real-world look at real-world challenges facing libraries and their place in today's society.

Starting with a brief history of the concept of “social capital” and what it means to libraries, Hill attempts to define the library's place in society and its relevance to patrons and information consumers. She applies five common practices to the concept of “libraries build communities,” leads the reader through the importance of those practices, and gives hands-on, how-to advice in an informative and entertaining manner. Chapter 5 gives a much needed look at marketing in libraries and addresses common misconceptions. A useful marketing strategy worksheet is provided that will help propel readers into building a marketing plan that works for them and their libraries. Particularly useful are the section on branding and collections they need, reflect their cultural values, and are the most impact when they inform citizens of services and collections they need, reflect their cultural values, and are communicated using the proper medium. The purpose of *The Library PR Handbook* is to help librarians strengthen public relations with their communities. All librarians interested in public awareness programs will find the content useful, but this volume, which focuses on “designer” board games and how they can be used for educational gains in the school library, fills a unique niche.

Authors Mayer and Harris lay out a persuasive argument for using designer games in the school library. They start by explaining how these sophisticated games differ from traditional board games, which usually require less skill and depend more on chance than designer games. The authors also discuss how these games can meet national and state curriculum standards in a school setting, and they include a helpful demonstration of how designer games have been used in their school library system. Games can teach important skills in a different way, and the authors clearly present a strong argument as to why and how they should be included in schools.

This book is for people looking for designer board games, as traditional games are not discussed, but traditional games are also more familiar and do not warrant much discussion in a school setting. For people unfamiliar with designer games, they can seem a little abstract at first, but Mayer and Harris do a nice job of making them easier to understand. This book is most relevant for school libraries, who can directly apply the advice given, but will also be useful for public libraries that are considering adding board game collections of their own.—Katy Herrick, Children's Librarian, Dallas (Tex.) Public Library

According to this new ALA book, library communications have the most impact when they inform citizens of services and collections they need, reflect their cultural values, and are communicated using the proper medium. The purpose of *The Library PR Handbook* is to help librarians strengthen public relations with their communities. All librarians interested in public awareness programs will find the content useful, but public librarians are the primary audience.

Mark R. Gould, the book’s editor, is a highly credible editor. He has spent twenty-five years in the communications field and has served as ALA’s Public Information Office director. The contributors work in communications fields, and some have
